aiety TreadTires

Goodrich lifted non-skid tires out of the emergency class and out of the expensive class. The five fingers and crosstie of the Good-

rich Safety Tread not only ward off the skid and help keep the car in its path-They guard and protect the inside of the

tire as well-absorbing and distributing

the shocks and strains, giving longer life and longer mileage and better tire service. The Safety factor in Goodrich Safety Tread Tires is

an added value without adding to the expense.

The five fingers and crosstie of the safety tread spread protectingly between the carcass of the tire and the road-

They give smooth tread riding, because they meet the road evenly-

They save the tire, because they guard the inside construction against jolts and jars and twisting strains-

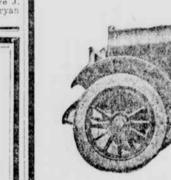

They help save money on your tire expense, because the tread itself gives longer wear, and by saving the inside of the tire gives you much longer mileage.

THE ACME OF SIMPLICITY ACCESSIBILITY DURABILITY

Every ounce of power developed by the motor is transmitted to the rear wheels through gears and shafts of nickel steel. The bodies of the "Dort" car carry out the streamline effect to perfection. Plenty of leg room in the driving compartment is provided for in both models.

DORT MOTOR CAR COMPANY FLINT, MICHIGAN

This is the car that carried seven full-grown people 241/8 miles on one gallon of gasolene.

This car weighs 3,000 pounds, contains all standard parts, and sells for \$1485. In the A. A. A. sanctioned test above mentioned it set the world's economy record, which it still holds.
